DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2 and 6-13, drawn to a protein, a polynucleotide encoding the protein, vector and a host cell.

Group II, claim(s) 3-5, drawn to an antibody to a protein.

Group III, claim(s) 14-15, drawn to a method of assaying a test compound for its ability to bind B1C3 receptor.

Group IV, claim(s) 16-17, drawn to a method for determining an agonist of a B1C3 receptor by measuring intracellular adenylyl cyclase activity or the intracellular concentration of calcium.

Group V, claim(s) 18-19, drawn to a method for determining an agonist of a B1C3 receptor by internalization of the receptor.

Group VI, claim(s) 20-21, drawn to a method for determining an antagonist of a B1C3 receptor by measuring intracellular adenylyl cyclase activity or the intracellular concentration of calcium.

Group VII, claim(s) 22-23, drawn to a method for assaying a test compound for its ability to alter the activity of a B1C3 receptor.

Group VIII, claim(s) 24-26, drawn to a method for assaying a test compound for its ability to alter the expression of a B1C3 receptor.

2. The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Pursuant to 37 C.F.R. § 1.475 (d), the ISA/US

Art Unit: 1646

considers that where multiple products and processes are claimed, the main invention shall consist of the first invention of the category first mentioned in the claims and the first recited invention of each of the other categories related thereto. Accordingly, the main invention (Group I) comprises the first recited product, an isolated protein comprising an amino acid sequence of SEQ ID NO: 1, and a first method of producing the protein, which includes claims directed to polynucleotides, vectors and host cells. Pursuant to 37 C.F.R. § 1.475 (d), the ISA/US considers that any feature which is the subsequently recited products and methods share with the main invention does not constitute a special technical feature within the meaning of PCT Rule 13.2 and that each of such products and methods accordingly defines a separate invention. Thus, the antibodies of Group II and polypeptides of Group I are distinct inventions because they are physically and functionally distinct chemical entities, and because the protein can be used in another and entirely different process from the use for production of the antibody, such as in a pharmaceutical composition in its own right, or to assay or purify the natural ligand of the protein. Further, the method of Group III does not constitute the special technical feature, which is an isolated protein of SEQ ID NO: 1, because it encompasses a method of using a B1C3 receptor, which can be a naturally occurring receptor. Groups III through VIII are unrelated independent inventions because they are directed to different methods that recite structurally and functionally distinct elements, are not required one for the other, achieve different goals, and therefore constitute patentably distinct inventions. Groups II and (III-VIII) are also unrelated because in the instant case the different inventions are not required one for the other in that antibodies of Group II are not required for the methods of Groups (III-VIII).

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
